# RAFFAELE PRINCE

## Software Engineer

raffaele.princee@gmail.com ☎+39 3317334889 Via Onofrio Fiermonte 20, 70010 BA Casamassima, Italy
raffsstein.github.io @SteinRaff raffaele-prince RaffSStein

## Impact summary

**Software Engineer** with **5+ years** designing and delivering high-scale, event-driven solutions in both **finance and insurance** markets. Proven ability and deep expertise in **Spring/Spring Boot/Quarkus** frameworks, in both Java and Kotlin programming languages. Team lead experienced in **mentoring junior engineers** and code delivery. Passionate practitioner of **AI**, actively applying it to day-by-day coding activities.

## Work Experience

Senior Software Engineer

**Accenture**

April 2024 – Ongoing Bari, IT (remote)

- Building and delivering a microservice event-based architecture (100+ API integrations) on both GCP **Spring Boot/Java + PostgreSQL** and AWS **Quarkus/Kotlin + MongoDB**.
- Migrated legacy monolith applications to microservices event-based architecture, improving scalability and maintainability.
- Building and defining a tech-insurance library for the management of insurance policies, useful for developers to easily integrate insurance products into their applications.
- **Leading** a cross-functional team of 8/10 people as **code delivery manager**.
- Oversaw **cloud cost optimization** and system performance tuning, resulting in a **30% reduction in operational costs**.
- Facilitated technical onboarding and mentoring within the team, increasing onboarding speed of new engineers.

Software Engineer

**Open Reply**

April 2021 – June 2024 Bari, IT (remote)

- Built an order execution engine and a suitability algorithm in 6 months, which directly contributed to a medior promotion.
- **Optimized Oracle databases**, including complex query tuning, which improved overall system performance by 25%.
- **Implemented complex batch processing solutions** for large data workflows using **Spring Batch**, handling millions of records efficiently.
- Automated data uploading and data transfer with **Bash and SQL scripting**.
- Performed tuning and scalability improvements, resulting in a **40% speed increase in data fetching and API response time**.
- Mentored junior developers and led a team of 6/8 developers.

## Skills

| | |
|---|---|
| **Languages & frameworks** | Java, Kotlin, C#, C++, Python, Spring, Spring Boot, Spring Security, Quarkus, Redis, REST API, Maven, Gradle TypeScript, SCSS, Angular |
| **Cloud & infrastructure** | Google Cloud Platform, AWS, Kubernetes, Docker, Terraform |
| **Data & messaging** | SQL, PostgreSQL, Hibernate, Oracle DB, MongoDB, Firestore, MySQL; Kafka, Pub/Sub, RabbitMQ; Elasticsearch, ELK |
| **Architecture** | Microservices; Event-driven architectures; Monolith (legacy systems); Distributed systems |
| **Monitoring & observability** | Splunk, JMeter, Micrometer |
| **Tools** | Git; GitHub; Bitbucket; CI/CD (GitHub Actions); Bash scripting; GitHub Copilot |
| **AI** | Spring AI, Ollama, GPT-5, Hugging Face models, Langchain, AgenticAI |

## Education

**University of Bari "Aldo Moro"** - BSc Computer Science (106/110) **Oct 2017 – Apr 2021**

## Languages

**Italian (Native)**
**English (C2)**
